**At Wolverham Primary School, we carefully track the progression of reading skills for each year group using the Literacy Company's Pathways to Read document. This covers progression in meaning of words, retrieval, sequencing/summarising, inference, prediction, structure and organisation, language choices and making comparisons.**

**This Progression in Mastery document is used to support teachers in tracking skills back for pupils working below age-related expectations. It ensures that pupils are being taught appropriate skills in line with those being taught to their peers. It provides staff with a clear overview of progression in skills from Year 1 to Year 6 by category across the year groups.**
