

# DT - Year 2 Spring 2

## Moving vehicles

### What should I already know?

There are different types of transport such as cars, planes and boats.

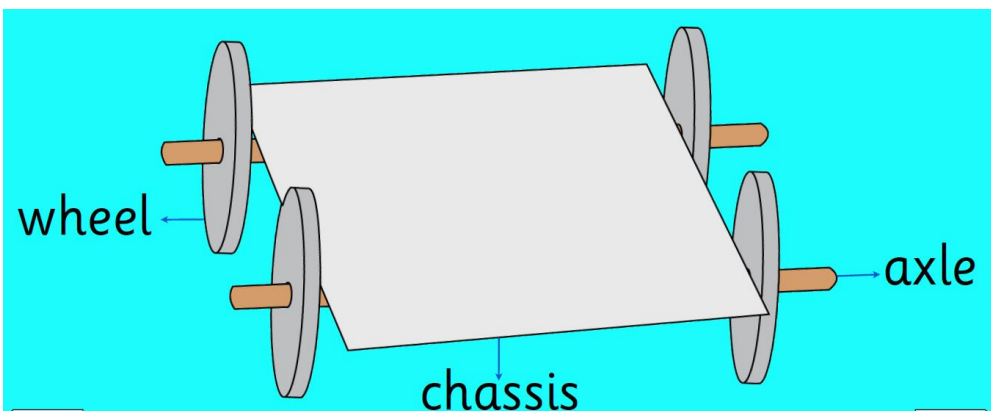

Some types of transport use wheels to help them move.

That I can use tools to cut and shape materials.

### Knowledge

A vehicle is something with wheels that transports people or objects.

Cars, trucks, buses and carts are all types of vehicles.

### Vocabulary

wheel	A round thing that helps cars and vehicles move.
axle	A stick that goes through the wheel and attaches to the chassis.
chassis	The bottom part of the vehicle.
vehicle body	The part on top of the chassis.

### Skills

Develop their design ideas through discussion, observation, drawing and modelling.

Measure, cut and score with some accuracy.

Assemble, join and combine materials in order to make a product.

Make simple drawings and label parts.

Talk about their ideas, saying what they like and dislike about them.
